The Rehoboth Community Trust

The Rehoboth Community Trust was founded by the “Baster Traditional Authority” in 2003. The main objective of the Trust is the upliftment of the living standards of the Rehoboth community including surrounding rural villages and all inhabitants irrespective of colour, race, ethnic origin, political affiliation, etc.

Our vision is to achieve this objective through strategic partnerships [mainly with Local, Regional and National Government] for sustainability and the creation of employment opportunities. Employment creation in itself is a great stimulant for economic growth and the ability to afford the basic services in life such as food, water & electricity, transport & health services. Thus our vision is a mirror of our National Government’s vision 2030 objectives. The success of our strategies for Local Economic Development (LED) is a paramount to the implementation of the strategies for this specific vision. Close cooperation and consultation with our Government is a key prerequisite for long-term success and sustainability. All Trustees are bound by and subscribe to this vision.

The Trust’s main source of income is from a freezer hake quota allocated to Ark Fishing Industries by the Ministry of Fisheries. In addition the Trust established their own sustainable projects to the benefit of the Rehoboth Community at large and in the process create permanent employment to a total of 29 local residents for the last 19 years.

The Rehoboth Community Trust is engaged in various social projects within the Rehoboth Community. Projects are split in economically sustainable ventures and social development initiatives. All income generated are ploughed back to the Community via carefully selected ventures.
